

# Resilience for the Nation's Oceans, Coasts, and Great Lakes

Please join the Coastal States Organization, the Integrated Ocean Observing System Association, the National Estuarine Research Reserve Association, the National Marine Sanctuaries Foundation, and the Sea Grant Association for a virtual briefing on coastal resilience.

Coastal resilience is a complex and continuously evolving issue. Effectively addressing it requires a collaborative framework of federal, state, and local partners. The NOAA partners represented in this briefing work together to provide tailored data and science, planning and management resources, education and outreach, and protection of lands and waters to comprehensively support coastal community resilience.

**Thursday, April 8, 2021**

**2:00 - 2:30 p.m. EDT**
